

# MOVING FORWARD

issues to be addressed in the Master Plan include:

## User Conflicts

- horse manure on trails is not desirable to bikers or hikers
- horse tracks widen trails and create craters that make mountain biking difficult and uncomfortable
- motorized recreational vehicle use on the entire trail system is not desirable to other users

*How can we mitigate conflicts between users?*

*How can we allow for maximum enjoyment of the trails with minimum conflicts for all users?*

*What rules of conduct will the trails have in the future? How will they be enforced?*

## Access / Parking

- there is no official, legitimate, and well-announced trailhead for the La Tierra Trails
- there are no clear safe off-road trail connections between the trails and other City trails
- current access to motocross track for trucks and trailers is unsafe and illegal
- the pull-offs to access the trails on Camino de los Montoyas do not provide adequate parking, traverse drainage ditches, and have poor drainage

*How will the trail network connect with existing trails of the County and City?*

## Trails + Maintenance

- some existing trail segments show signs of erosion due to poor alignment, un-educated trail users, and un-checked trail building

*Who will maintain the trails? Who will be the stewards of the land?*

*What standards will be used for future trail building or re-alignment of the existing network?*

*How can the wilderness appeal of the trails be maintained while providing adequate way-finding?*

## Security + Maintenance

- some trash still remains on the land from previous history of illegal dumping
- structurally unsafe building in northeast corner of site is a safety concern
- land still shows evidence of illicit activities such as overnight camping, trash dumping, and shooting practice

*How can we prevent illegal use of this land? How can we gain respect of the natural land?*

## Interior Property Owners

*How will the interior property owners be involved with the trails master plan? What will their level of involvement be?*
